

MPEG-Encoder V3

Connector Description

1	Cinch audio left	0 dB signal level
2	Cinch audio right	Signal level adaption only possible after circuit change on the Encoder board!
3	Cinch Video	Supported standards PAL/NTSC
4	S-Video	
5	4pol. Connector	text. I ² C-Bus (+5 V, GND,...)
6	14pin Header	ITU-656
7	34pin Header	Connection to modulator board
8	3pin Header	XError from Encoder-IC and test output of videocontroller (used for error handling in future SW versions)
9	LED green	Operation voltage 3,3 V ok
10	LED red	Operation voltage 1,8 V ok
